

# Half-Time Course Evaluation Meeting Protocol

**Course name:**  
Audio Technology and Acoustics

**Course code:**  
VTA136

**Academic Year:**  
2017/2018

**Date**  
September 21, 2017

**Meeting participants:**  
Rebecca Gillie, Adam Marczak, Niklas Brundin, Anna Swierkosk, Niklas Zeidler, Jens Ahrens

**CHALMERS**

## Lectures

Well appreciated, pace is on the faster side, more practical examples in the lecture to illustrate the theory to have a better connection to the exercises

## Exercises

Re-cap of the home assignments sometimes takes too long, maybe switch the order of re-cap and home assignment discussion, save time on home assignments presentations through 1) potentially electronic reporting system, 2) see "proposed changes", 3) pick the presenters in the very beginning of the exercise

## Tutorials

Tutorials are very helpful, scheduling is a bit of dilemma as a week has only 5 working days, everybody has to wait when tutor focuses on a particular individual problem, maybe have 2 tutors present

## Course as a Whole

Makes sense

## **Exam**

N.a.

## **The Red Thread**

The hearing and speech chapter appears interjected but ok

## **Miscellaneous**

Sometimes too much activity on stage, sometimes too much jump to old content

## **Proposed Changes**

Exercises: Take picture of home assignment solutions and project them to save on time

Lectures: Add pointer to previous slides in the current slide deck
